Meta Back-End Developer Capstone Project Overview

Written by John Tu

Contents of the Capstone Project:

<u>Python Files (.py):</u>

- Project-level folder (littlelemon):
  - settings.py
  - urls.py
- App-level folder (restaurant):
  - models.py
  - serializers.py
  - urls.py
  - views.py

  manage.py

How to run the program:

1. Make sure to activate the virtual environment in the current directory by running the following command: scripts\activate.
2. Either while using the command prompt or Visual Studio Code, run the server with this command: python manage.py runserver.
